

Fire Blankets Model FGB 01

Fire blankets are designed and manufactured to the BS EN 1869:1997 standards. They are fully tested by BSI and certified to Kite mark.

Fire Blankets when draped over a fire, the blanket cuts out the oxygen, leading to rapid fire extinction.

They are available in three different size of 1.1m x 1.1m, 1.2mx1.2m and 1.2mx1.8m and other sizes are available upon request. The containers are simple to use with pull tabs to release the blanket.

Fire blankets have been reserved for chip pan fires but fire safety professionals are increasing recognising the ability of a fire blanket for other areas.

Fire blankets are suitable for Class F-cooking oils or fats.

Applications

- Caravans
- Kitchens
- Laboratories
- Offices
- Homes
- Workshops
- Welding areas etc.

Always read the instructions for your fire blanket before use. Fire blankets can only be used once. Please ensure to discard once used and replace it with a new Fire blanket.
