

## SECUPRO MERAK

Fully automatic blade retraction for a very high degree of safety

Ergonomic handle for greater efficiency

Blade-change button to release the lever and the blade therein

Safety lock to lock and unlock the lever

Smooth, easy-to-squeeze lever to engage the blade

4-times usable blade for longer durability

**Please note:** to ensure your product always functions flawlessly, regularly remove any build-up of cutting material.

### USAGE

To engage the blade, unlock the cutter and **squeeze the lever**. Now you can cut.

For best results, cut plastic strapping band **diagonally** (at a 45° angle).

Use the underside of the cutter head as a supporting surface to **work ergonomically** and efficiently.

To prevent unintentional blade activation, always **lock the cutter** by pressing downwards on the lock symbol.

### BLADE CHANGE

Lock your cutting tool and pull back on the small **black blade-change button**.

**Swing the lever out** of the handle and flip open the blade cover.

Now you can either **rotate or replace** the blade. Flip the blade cover closed.

Finally, push the lever back into the handle until you **hear it click into place**.

### PROTECTION OF USER

The blade automatically retracts into the handle the moment cutting ceases. Even when the lever is **still being squeezed**.

### PROTECTION OF GOODS

An appropriately **small cutting depth** serves to protect your goods.

### DISPOSAL

Your SAFEBOX is the best place to store **used blades**.

When the SAFEBOX is full, **empty all contents** into your RECYCLING BOX.
