# SAFETY POSTER
# INSTRUCTIONS FOR THE SAFE HANDLING OF YOUR CUTTING TOOL

**martor**

## SECUMAX EASYSAFE

**Small metal plate**
to split adhesive tape

**Concealed blade**
for maximum protection of
goods and users

**Safety-screw**
to lock the blade changing
head

**Plastic material guide**
makes cutting thin foil and
paper easier

**4-times usable blade**
for longer durability

**Pointed nose**
for easy piercing of
cutting material

## USAGE

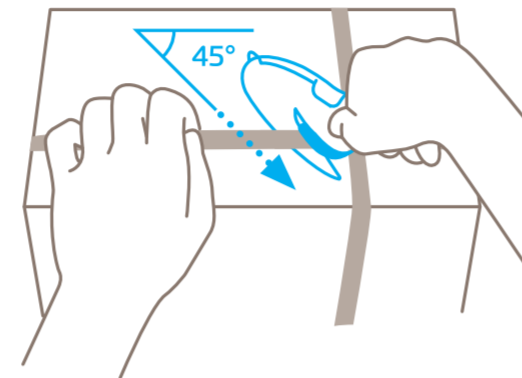

For best results, cut plastic strapping band **diagonally** (at a 45° angle).

The **plastic guide** flattens the material being cut, making thin foil and paper easy to work with.

To use the **tape splitter** located at the head of the cutter, simply turn the cutter over.

Use the locking key to **lock the blade change** mechanism ("lock closed").
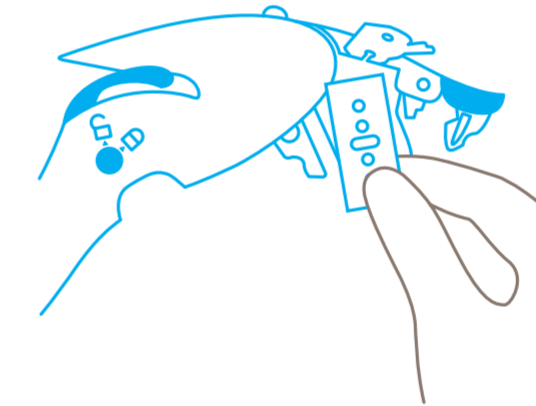

## BLADE CHANGE

Use the locking key to **unlock the blade change** mechanism ("lock open").

With two fingers, **disengage the blade holder** and swing it open.

You can now lift up the blade cover to either **rotate or change** the blade.

Finally, close the blade cover and push the blade holder **back into the handle**. With a click, everything is in place.
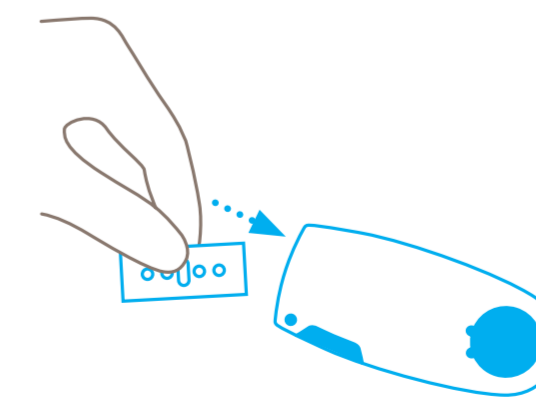

## PROTECTION OF USER

The concealed blade provides a maximum protection from **cut injuries**.
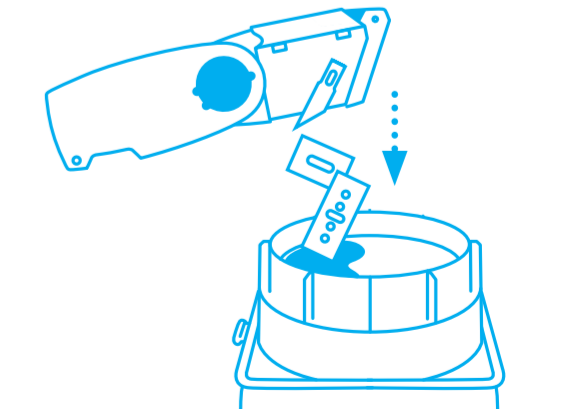

## PROTECTION OF GOODS

The concealed blade **won't come into contact with your goods** either.

## DISPOSAL

Your SAFEBOX is the best place to store **used blades.**

When the SAFEBOX is full, **empty all contents** into your RECYCLING BOX.

**Please note:** to ensure your product always functions flawlessly, regularly remove any build-up of cutting material.
