

SAFETY POSTER

INSTRUCTIONS FOR THE SAFE HANDLING OF YOUR CUTTING TOOL

SECUPRO MERAK

USAGE

To engage the blade, unlock the cutter and **squeeze the lever**. Now you can cut.

For best results, cut plastic strapping band **diagonally** (at a 45° angle).

Use the underside of the cutter head as a supporting surface to **work ergonomically** and efficiently.

To prevent unintentional blade activation, always **lock the cutter** by pressing downwards on the lock symbol.

BLADE CHANGE

Lock your cutting tool and pull back on the small **black blade-change button**.

Swing the lever out of the handle and flip open the blade cover.

Now you can either **rotate or replace** the blade. Flip the blade cover closed.

Finally, push the lever back into the handle until you **hear it click into place**.

PROTECTION OF USER

The blade automatically retracts into the handle the moment cutting ceases. Even when the lever is **still being squeezed**.

PROTECTION OF GOODS

An appropriately **small cutting depth** serves to protect your goods.

DISPOSAL

Your **SAFEBOX** is the best place to store **used blades**.

When the **SAFEBOX** is full, **empty all contents** into your **USED BLADE CONTAINER**.

Please note: To ensure your product always functions flawlessly, regularly remove any impurities. For additional safety, we recommend wearing gloves.
