

Fire Watch

FW Detector Base

The FW Detector base has been designed for easy installation of the detector to the base, without the need of force which can be useful when mounting detectors to suspended ceilings. The detectors have a one-way fit to the base, and the FW detectors can be locked into place by a 1.5 mm hexagonal grub screw.

Model No: FW45681-211

Detector locking mechanism

One-way fit

Easy to wire

Contains an Earth connector

Contains no electrical parts

Terminal for Remote Indicator
