CHQ-WSB2 Wall Sounder Beacon Tones & Volumes

This Application Note covers the CHQ-WSB2, ST-AWSF Wall Sounder Beacon.

Description

The CHQ-WSB2 & ST-AWSF Wall Sounder Beacon is designed to fit onto either a Sounder Mounting Base (YBO-R/3) or a Short-Circuit Isolator Mounting Base (YBO-R/SCI). The CHQ-WSB2 is an EN 54-3 Type A audible alarm device, or type B when used in conjunction with a weatherproofing kit (CHQ-WPK).

EN54-3 Approved Tones

The following tables give the minimum sounder performance (dB(A)@1m) of each Tone when tested under EN54-3 test conditions. Figures are given for six horizontal and six vertical directions, measured when the CHQ-WSB2 mounting base is installed as shown in Fig. 1.

Mounting orientation with sensor alignment mark on base positioned vertically, at top.

NOTE: The sound pressure level (SPL) is dependent on current setting selected for the sounder, and also on the tone setting.
