Description

DSPA aerosol generator 11-4 and 11-7 can be used as a part of a highly effective fire extinguishing system. A DSPA generator is non-pressurized and is installed inside a room or compartment that requires protection. After activation, an aerosol cloud is generated, which expands volumetrically, flooding the space and extinguishing the fire. The DSPA generators are mainly designed to use in normally unoccupied and unoccupied areas and are effective on class A, B, C fires.

Application

The DSPA generator 11-4 and 11-7 is recommended for the protection of semi large compartments such as storage rooms, archives, technical rooms and server rooms.
