CLEANING MADE EASY – HYGIENE IN THE FIELD

Bullard Care Kit

SHINING PERFORMANCE

You shine with selfless dedication to others and we shine with our well-engineered solutions designed to enhance your hygiene in the field. A good example are helmets that are easy to disassemble and clean. And because washable textiles need to be regularly replaced to comply with hygiene demands, we offer you the Bullard Care Kit, which contains a brow

pad, an ear/neck protector and cotton ratchet covers. A practical washable mesh bag is included with every order at no extra cost. Our consistently-implemented hygiene concepts are our contribution, not only to health preservation in the face of everyday fire-fighting activities, but also to reducing the long term risks associated with chemical exposure.

**WE HELP
PROTECT HEROES**
For every Bullard Care Kit sold*
we will donate one euro to the
non-profit organisation FeuerKrebs.

OVER 100 YEARS OF EXPERIENCE

Our vision is to advance human safety to enable long, healthy, productive lives through innovative solutions. This is why we have been developing innovative work protection solutions for more than 100 years. Founded in 1898 in San Francisco, Bullard is one of the world's leading suppliers of personal

protection equipment. The "Hard Boiled®" hat developed by its founder, Edward Dickinson Bullard, in 1919 symbolises the success of the company. It is a classic design, immediately recognisable, and a standard-issue component on building sites and other operational locations all over the world.

*Sales made throughout Germany for the period 1 April 2019 to 31 October 2019. The helmet is not included with the Bullard Care Kit.

THE KIT FOR ALL POSSIBILITIES
